

6. Predict the output:

```
int main()
{
    int sub[50], i;
    for (i = 0; i <= 48; i++);
    {
        sub[i] = i;
        cout << sub[i] << endl;
    }
    return 0;
}
```

Output : ERROR

Semicolon at the end creates an empty loop
